

Disposable Line

Auto Stop Cranial Perforator (Trepanation)

The Auto Stop Cranial Perforator is indicated for performing the initial access in craniotomy procedures through trepanation holes, with its action automatically interrupted upon contact with soft tissues

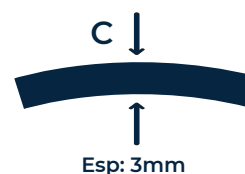

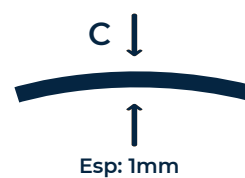

A ø 8 mm

A ø 11 mm

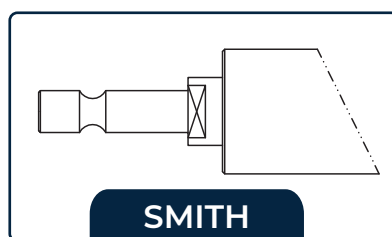

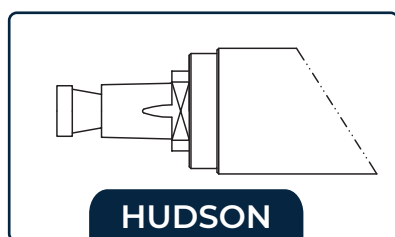

A ø 14 mm

INSTRUCTIONS FOR USE (IMPORTANCE OF PROPER POSITIONING):

To ensure a safe and effective operation, it is extremely important to maintain the precise position (90°) of the perforator in relation to the cranium. This position must be constantly kept in mind throughout the entire drilling process.

Coupling Types

A - External perforation diameter
B - Internal perforation diameter
C - Minimum skull thickness required for automatic stop system to activate
